

XJP30D

Probes and alarms data acquisition module, without display, able to read up to 12 D: 4 DIN Rail mounting

- For collecting data from any kind of installation
- Up to 6 inputs for NTC, PTC, 4÷20mA and 0÷10V and 3 digital inputs or 4 Pt100 inputs and 4 digital inputs
- Remote display option
- Standard communication protocol ModBUS-RTU
- 6VA max power absorption

Features

Power supply	24, 110, 230Vac
---------------------	-----------------

Inputs

Analogue	3x NTC/PTC/4÷20mA/0÷10V
Digital inputs (power supply voltage)	3
Digital inputs (free of voltage contacts)	3 optional

Other Outputs

Hot Key/Prog Tool Kit output	present
Remote display output	X-REP
Remote keyboard output	KB1-PRG
Serial output	RS485

Other

Serial address	3
-----------------------	---

Measurement

Measurement range	probe dependent
Accuracy	Better than 1% of full scale

Generals

Housing	Self extinguishing ABS
Data Storage	EEPROM memory
Operating temperature	0°÷60°C 32°÷140°F
Storage temperature	-30°÷85°C 22°÷185°F
Relative humidity	20÷85%
Resolution	0.1°C or 1°F
Connection	Screw-terminal block

<2.5mm²

Accessories:

programming keyboard KB1-PRG

cable CAB/KB11
